PAVING MATERIAL

MAY BE PRODUCED

IN THIS CITY

Two Blocks to be Laid in Connection with Experiment by the Lighting and Power Company.

Under instructions from the parent company, Manager A. F. Van Deuse of the Albuquerque lighting company and power company is to experiment with the coal tar products at the power house in order to determine if it is worth making into paving material. City Engineer James N. Gladding has planned to pave two blocks with the experimental material.

This information was conveyed to the council last night when Councilman S. B. Gilbert announced that Assistant State Engineer C. B. Morrell wanted to rent the city's steam roller for eight or nine months for use on the Albuquerque-Santa Fe road. The roller would be needed by the city in the paving experiment. Engineer Gladding said.

Council decided that, perhaps, as the city needed a roller, it would sell the present one if the state wanted to buy it, but wouldn't rent it.

"I have been somewhat cautious, but Dean's Beagles give just the results I desire. They act mildly and regulate the bowls perfectly,"—Geo. B. Krause, Altoona, Pa.
